Web Application Security

Rational AppScan

Connectivity Solutions

Rational Host Access Client Package & Host On Demand (HACP/HOD)

Middleware

WebSphere Application Server

Value+ Services

Best Practice Installation, Configuration, Customization, Training and Mentoring:

Rational Team Concert & Rational Quality Manager

- ✓ **RTC:** Unified software delivery process (RPG, Cobol, Java, .Net, PHP)
- ✓ Real-time collaboration for centralized and distributed developer teams
- ✓ Out-of-the-box processes to accelerate software delivery
- ✓ Lifecycle traceability for governance & compliance (SOX, HIPAA)
- ✓ **RQM:** Real-time, in-context team collaboration for the Quality lifecycle
- ✓ Test lab management to track, schedule and execute tests
- ✓ Integrates with Rational Functional Tester for automated regression testing

Arcad-RTC Power Pack

- ✓ Best-of-breed SCM and version control for all IBM Power objects
- ✓ Seamless integration with RTC
- ✓ Code, DB, and file dependency analysis
- ✓ Automated software builds
- ✓ Automated software deployments
- ✓ Full rollback and reversion
- ✓ Arcad Integrated ALM solutions for Power

Developer Tools

- ✓ Replace obsolete command line toolsets
- ✓ Tangibly improve developer productivity
- ✓ Industry standard Eclipse framework

Cross-Platform Modernization

- ✓ Leverage, extend and increase the value and competitiveness of mission critical legacy applications
- ✓ Quickly transform legacy systems into intuitive customer and user web apps
- ✓ Minimize project risk and accelerate time to market

Value+ Services

Training Programs

- ✓ Rational Developer for Power (RDp)
- ✓ Rational Developer for z (RDz)
- ✓ Rational HATS

Web Application Security:

IBM Rational Appscan

- ✓ Solutions for General Business & Midmarket Enterprises

Onshore Services:

- ✓ RPG, Cobol, EGL, Java: Supplemental & Code Remediation Services
